

[illegible]

This technical drawing illustrates a road cross-section with a total width of 251.400m. The drawing includes a detailed elevation profile at the top, showing the road surface and surrounding terrain. The road surface is marked with a centerline and two side lines. The elevation profile shows a peak of 334.00m at the centerline, with a dip of 327.75m at the side lines. The road is flanked by a 10m wide shoulder on each side, with a total width of 251.400m. The drawing also includes a detailed cross-section of the road surface, showing the road width, shoulder width, and the location of the centerline. The road is flanked by a 10m wide shoulder on each side, with a total width of 251.400m. The drawing also includes a detailed cross-section of the road surface, showing the road width, shoulder width, and the location of the centerline. The road is flanked by a 10m wide shoulder on each side, with a total width of 251.400m.
