

VÝKRES ŠIRŠÍCH VZŤAHOV

A square with a circle inscribed within it. The circle is tangent to the top, bottom, and side edges of the square. A vertical line segment connects the top vertex of the square to the center of the circle. Two diagonal line segments extend from the top vertex of the square to the points where the circle intersects the left and right sides of the square. These three line segments form a triangle with its base on the circle's circumference and its apex at the top vertex of the square.

SPRACOVATELIA ÚPN A URBANIZMÚ: ING.ARCH. PETER KRAJČR, ING.ARCH. PETER KRAJČR
