Chapter A) Information according Article 1(1) of the Commission Decision 2005/293/EC

• Source of information

Input data for working out the Report concerning the monitoring of the reuse/recovery and reuse/recycling targets were obtained from reports of authorized establishments or undertakings carrying out treatment of end-of-life vehicles in 2019 sent to the Ministry of Environment of the Slovak Republic (MoE SR). Structure of reports was based on the Commission Decision 2005/293/EC laying down detailed rules on the monitoring of the reuse/recovery and reuse/recycling targets set out in Directive 2000/53/EC of the European Parliament and of the Council on end-of-life vehicles.

According to the national legislation an authorisation granted by the MoE SR according to section 89, subsection 1a) of Act No. 79/2015 Coll. on waste and on amendment of some acts as amended (the Act on waste) is required for end-of-life vehicles treatment.

In 2019, the activity „treatment of end-of-life vehicles“ was carried out **by 48 authorised treatment facilities:**

1. **Aluex s.r.o.**, Môľovská cesta 8460, 960 01 Zvolen
2. **Anna Gajdošová – PROTAN**, Stropkovská 1, 089 01 Svidník

Following table shows the total number of vehicles treated in 2019 including their total weight in tonnes.

Total number of end-of-life vehicles treated	52722
Total weight (W) of end-of-life vehicles treated, in tonnes	52541,501

Total weight is the sum of actual weights of all end-of-life vehicles treated because each end-of-life vehicle is being weighted before entering the authorised treatment facility.

- **Quality of information source**

Authorised establishments/undertakings carrying out treatment operations report once a year data for the previous year, based on record keeping on the treatment activity (“A report of the treatment facility for end-of-life vehicles”). This obligation for establishments/undertakings carrying out treatment operations is set up in article 21 of the Decree of the MoE SR No. 366/2015 Coll. on record keeping and reporting obligation as amended. According to article 65, paragraph 1r) of the Act on waste, they are obliged to keep and retain records of end-of-life vehicles treatment. They send the data from the records to competent waste management administrative authority, vehicle producer as well as producer responsibility organization with which they have concluded a contract. Data on amount of end-of-life vehicles collected are entered by authorised treatment facilities into the electronic system – eZAP administrated by the Automotive Industry Association of the Slovak Republic (ZAP SR). The MoE SR also has an access into the eZAP.

Data for the year 2019 were collected from all authorised treatment facilities operating during the relevant year. These data are complete.

- **Determination of the weight**

Each authorised treatment facility is equipped with appropriate storage premises, technologies and devices for end-of-life vehicles treatment. Each treatment facility has scale for the determination of the weight of end-of-life vehicles entering the treatment facility. The scale is being calibrated in regular intervals. Weighing of end-of-life vehicles occurs immediately after an end-of-life vehicle enters a treatment facility. The total weight of end-of-life vehicles received is recorded in the report of the treatment facility for the end-of-life vehicles.

On the basis of data obtained, the treatment facilities report continuously data to the eZAP and annually they report data from the records to competent waste management administrative authority. Once per year they send “A report of the treatment facility for end-of-life vehicles” for the previous year to the MoE SR. The average weight of end-of-life vehicles is calculated afterwards on the basis of reports received from authorised treatment facilities.

The form “A report of the treatment facility for end-of-life vehicles” clearly defines what method should be used for entering the data into tables. Thus it is ensured that double counting of end-of-life vehicles or their parts does not occur. In case of any vagueness the authorised establishments/undertakings carrying out treatment of end-of-life vehicles may contact MoE SR by telephone or email.

- **Recycling or recovery of exported ELVs respectively parts of ELVs**

Table 3. Monitoring of (parts of) end-of-life vehicles arising in the country and exported for further treatment (tonnes)				
Country exported to	ELVs exported	Recycling of ELVs exported	Recovery of ELVs exported	Disposal of ELVs exported
		F1	F2	F3
Total	0	639,143	705,844	0

According to the data reported by the authorised facilities for end-of-life vehicles treatment, authorised facilities exported following waste for the purpose of its recovery to EU Member State (detailed information in the table below).

Detailed information on export of parts of end-of-life vehicles in the year 2019:

Total recycling of (part of) end-of-life vehicles exported (F1)	Total recovery of (part of) end-of-life vehicles exported (F2)	Total weight of end-of-life vehicles which are exported per country	List of Waste	Country
8,135	15,666	0	Spent catalysts containing gold, silver, rhenium, rhodium, palladium, iridium or platinum (except 16 08 07)	Czech Republic
0	2,6	0	Ferrous metals	Italy
262,5	262,5	0	Ferrous metals	Austria
28,05	84,62	0	End-of-life tyres	Czech Republic

Validation process:

Authorised facilities for end-of-life vehicles collection and treatment are obliged to report stated data to relevant waste management state authority on annual basis. Data for the whole year are reported to the MoE SR on the basis of "A report of the treatment facility for end-of-life vehicles". Authorised facilities for end-of-life vehicles treatment are controlled by the Slovak Environmental Inspectorate and by competent waste management administrative authorities. The above-mentioned institutions are state supervisory authorities in the field of waste management.

Data for the year 2019 were processed and provided in the same way as in the previous evaluation period.

Producer of vehicles is obliged to provide processors of end-of-life vehicles with information on the environmentally sound processing of end-of-life vehicles on a technical medium or by means of electronic communication within six months of placing on the market a new model of a vehicle manufactured or imported by them.

Producer of vehicle components which are used in vehicles shall immediately, at the request of a processor of end-of-life vehicles, provide the processor on a technical medium or by means of electronic communication information relating to dismantling, disposal and testing of the components that can be reused.

Producer of vehicles and producer of vehicle components are obliged to publish information about the design of vehicles and their components with respect to possibility of their recovery including way of recycling, development and optimization of possibilities and ways of re-use of end-of-life vehicles, their components and constructional elements as well as their recovery including

recycling, progress achieved by increasing of volume of recovery and recycling of components and elements of end-of-life vehicles with the aim to reduce the amount of waste determined to disposal.

Chapter B) Information according to Article 1(2) of the Commission Decision 2005/293/EC
It is required only if „the method of metal content assumption“ was used.

The method of metal content assumption was not used.

Chapter C) Information according to Article 1(3) of the Commission Decision 2005/293/EC

- **The current national vehicle market**

- *Number of vehicles put on the market*

Vehicles registered in 2019:

- a) **101 568** new vehicles of M1 category and **8 508** new vehicles of N1 category
- b) **68 155** used vehicles of M1 category and **6 062** used vehicles of N1 category that were imported into the Slovak Republic

The total number of registered vehicles was **184 293**.

- *Number of used vehicles exported to EU Member States:* **information not available**
- *Number of used vehicles exported to countries that are not EU Member States:* **information not available**
- *Description of data source, source quality, completeness (coverage rate) and validation process, description of assumptions and calculations*

Data on the number of registered new and used vehicles are provided by the ZAP SR. ZAP SR is a member of the European Automobile Manufacturers' Association (ACEA). It administers e-ZAP information system, which registers automobile manufacturers and importers, as well as establishments/undertakings carrying out treatment of end-of-life vehicles.

- **Data on end-of-life vehicles at a Member State territory**

- *Number of end-of-life vehicles collected in the national system (category M1 and N1)*

According to the Automotive Industry Association of the Slovak Republic (ZAP SR) 55 898 end-of-life vehicles were collected in 2019.

- *Number of end-of-life vehicles, treated by authorised persons, exported to EU Member States*

In 2019 no end-of-life vehicles were exported to EU Member States

- *Number of end-of-life vehicles, treated by authorised persons, exported to countries which are not EU Members*

In 2019 no end-of-life vehicles were exported to countries which are not EU members.
